

Are you working with or have thought of doing research using video data?

We at VILA offer support to help you organize and analyse your video material.

The VILA walk-in-shops offer support of primarily two software packages: Transana and ELAN. Researchers and students can get help with basic and advanced technical matters (media conversion, transcript templates in Transana and ELAN, fixed transcript vocabularies in ELAN etc.) and conceptual matters (design of structures in Transana, coding of video data, strategies for working with video data etc.).

Next walk-in lab:

**Wednesday the 3rd of June from 13.00 – 16.00 in the VILA Lab,
NHG 14, room 2.16**

All are welcome from newbies to specialists!
